

INNOVATION

INSPIRED BY YOU

After years of research, design and consultation with leading architectural experts, we're proud to introduce our latest innovation: Loewen Retractable Screens. Constructed of solid wood to conceal the screen hardware and designed with minimal obstruction to the viewing surface, these custom screens are the perfect complement to our existing lineup of Douglas Fir and Mahogany windows.

The Loewen Retractable Screen has been created with a balanced design and outstanding functionality. The edge band is fully concealed within the horizontal pull down rail while the integrated braking system allows for one-touch retraction. All of which helps the screen to open and close simply, smoothly and quickly.

Clean design blends seamlessly with window frame

Minimal Pull Rail size

Traditional Casement, interior view

PURE INNOVATION

The clean, purposeful design blends seamlessly as an integral part of the window with minimal obstruction of the viewing surface. Solid wood construction is luxurious to the touch and beautiful to the eye. Simply put, these are key features in a window that will stand the test of time.

SUPERIOR DESIGN

- Concealed hardware allows the screen to blend seamlessly within the window frame
- Warm beauty of Douglas Fir and Mahogany fully conceal the screen hardware
- Consistent pull down operation on both Casement and Awning windows
- Balanced aesthetics with continuity across product lines
- Visually consistent mouldings for operating and fixed units
- Limited intrusion into daylight opening
- One-touch retraction of the screen is simple and smooth, transitioning from insect protection to clear views in seconds with the advantage of built-in Winter storage
- Integrated braking system enables a hands free and controlled retraction of the screen
- Flexible screen guides provide visual clarity

AVAILABILITY AND DETAILS

- Available on both Traditional and Push Out Awning products, including Mission options
- Available on both Traditional and Push Out Casement products, including French and Mission options
- Fits within unit jamb depths as low as 4 9/16"
- Available on both double and triple glazed units
- Available in Douglas Fir or Mahogany with primed options
- Minimal Pull Rail size for enhanced viewing
- High visibility screen mesh
- Pull Cord option for easy operation on taller units

WOOD SPECIES

- Available in standard Douglas Fir or optional Mahogany
