LOEWEN MULTISLIDE

P2

MULTISLIDE doors provide large dramatic openings for the transition from indoor and outdoor living spaces. With an easy, smooth and quiet operation, using stainless steel tracks, MultiSlide interlocking sliding panels provides secure and weatherproof options in large openings. A large selection of custom configurations and design options are available, including bi-parting and hidden pocketing.

Loewen narrow stile and rail panels provide a contemporary look with a narrow stile $2\frac{7}{8}$ " face width. This width is narrower than many sliding door programs while still incorporating an available flush handle and multipoint locking mechanism. Also available in the wide $4\frac{5}{16}$ " stile. The panel construction, using authentic Loewen door components, results in a cohesive aesthetic with other Loewen product lines.

Our unique $2\frac{1}{4}$ " thick panel adds superior thermal performance, as well as strength and durability. The high structural integrity and raised threshold options allow MultiSlide doors to be located in areas of moderate to high exposure where homeowners want a broad view with no visual interference — mountain, hillside or lake-front vistas. Multi track thermally broken frame and sill is available in raised sill with no riser, $1\frac{1}{8}$ " riser and $1\frac{1}{2}$ " riser for best performance.

Doors can be clad in a variety of colors from the extensive Loewen palette, and are available in Douglas Fir or in Mahogany interiors.

LOEWEN MULTISLIDE

STANDARD FEATURES

- Standard panel heights up to 10 feet.
- Standard panel widths up to 5 feet; custom sizes available
- Natural Douglas Fir interior (no visible finger joints)
- Low E insulated tempered glazing
- 2 1/4" (58 mm) thick sliding panels

STANDARDS

Most units have been tested by an independent laboratory for air and water infiltration, structural performance and thermal performance.

PANEL

Manufactured from Coastal Douglas Fir kiln-dried lumber. The entire Loewen product line is also available in optional Mahogany or optional FSC® chain of custody certified Douglas Fir (SCS-COC-005141).

PRESERVATIVE TREATED

Manufactured from Coastal Douglas Fir kiln-dried lumber.

DOOR PANELS

Opening panel is equipped with two sets of adjustable ball bearing tandem rollers. Sash is 2 1/4" (57 mm) thick for extra strength and durability.

GLAZING

With countless glazing configurations and Low E coating options, we ensure that you can choose the perfect blend of protection and comfort.

INSULATING GLASS

Double or triple insulating tempered glass configuration, with 1/2" (13 mm) airspace.

HEAT-SMART® SYSTEMS

Heat-Smart® best describes the benefits of the product that incorporates Low E coating and argon gas. Heat-Smart® systems help reduce heating and cooling costs, providing superior energy efficiency.

SIMULATED DIVIDED LITES (SDL)

Standard SDL complete with airspace grilles. Grille bars are permanently applied to the interior and exterior.

METAL CLADDING

Heavy duty exterior metal cladding comprised of extruded aluminum is available in a variety of Standard and Architectural Palette colors. Interior of door can be natural wood, unfinished or primed. Metal clad units are supplied ready-to-install complete with optional metal nailing flange.

SILL TRACK

Extruded metal sill with stainless steel cap over operating track for ease of operation and long-lasting performance. An internal weep system with drainage holes keeps water out of the interior trough.

HARDWARE

Multi-point locking hardware, in patio and flush handle styles. The locking hardware is also available in several optional finishes. Stainless steel roller assemblies are optional.
