Contemporary Solutions
Define Your Home
FEATURES

Authentic Design
Understated Luxury

Discover a wide range of solutions for your contemporary look featuring the sharp design, custom options, and large openings that only Loewen can provide.

Expansive windows, window walls, and large openings are all features of a contemporary home.
Wood Clad & All Wood
Loewen windows and doors are available in a variety of sleek and narrow aesthetics in metal clad and wood exterior finishes.

Timber Curtain Wall
Specifically designed for the premium contemporary home, our Timber Curtain Wall combines the warmth of wood with beautiful expansive views.
Wood Clad and All Wood Excellence in Design and Performance

Versatility is one of the key elements in the hallmark Loewen product offering—there are many possible contemporary style combinations with Loewen standard products. Loewen Wood Clad and All Wood products use only coastal Douglas Fir or Honduran Mahogany in our frames and sashes. These premium materials enable the large openings desired in contemporary architecture with the organic beauty and warmth of wood. Our Narrow Stile and rail door products provide custom contemporary solutions for large openings. These expansive glass styles are available for Terrace Door, Bifold Door and MultiSlide doors.

Narrow Stile Doors
Slimmer stiles and rails compared to the standard Terrace Door panels while still incorporating the standard Terrace Door frame. Available in Inswing, Outswing and Bifold configurations.

MultiSlide
MultiSlide doors provide multiple stacking door panel solutions for large openings, perfect for blending indoor and outdoor living spaces.

LiftSlide
Loewen LiftSlide doors allow expansive door panels to roll smoothly and easily into a pocket or a stack. This style of door not only provides panoramic vistas but also extends the living space of your home.
Corner Windows
Corner Windows provide a unique view enhancing the design of your home. These windows are available in either direct set or sashed configurations with butt-glazing or low-profile corner posts.

Retractable Screen
Retractable Screen is constructed of solid wood to conceal the screen hardware and designed with minimal obstruction to the view, these custom screens are the perfect complement to our Douglas Fir and Mahogany windows. The integrated braking system allows for one-touch retraction.

Contemporary Casing
Contemporary Casing provides a crisp, clean look to the exterior of the window by concealing the accessory groove of the aluminum frame cladding.
Narrow Jamb with Contemporary Casing

Thin sight lines and flat profiles can be achieved with custom jambs and square glazing stops.

Contemporary Frame Cladding

Nailing flange can be adjusted back to provide a reveal from 5/16" to 3/4".
Selecting a style and finish that reflects your unique taste is a critical part of creating the right look. Loewen offers a wide range of handles, locking systems, and other hardware options for our windows and doors.

**Contemporary Pushout Handle**

For Casement

(Satin Nickel)
Loewen uses only pre-finished extruded aluminum (AAMA 2605) cladding to better protect window and door exteriors and eliminate the need for painting. The Loewen contemporary series features metallic painted finishes, matte finishes and anodized aluminum finishes.

**Metallic Painted Finishes**
Loewen’s Metallic Painted Finishes provide the perfect finishing touch for fulfilling your vision, while also providing industry-leading quality and performance to uphold it.

**Matte Finishes**
Reduced lustre matte finish for a metal window appearance.

**Anodized Finishes**
For a durable alternative to paints and organic coatings, Anodized finishes offer a rich matte appearance that reduces sunlight glare and allows the aluminum to maintain its metallic appearance. In addition to the aesthetically desirable etching, Anodized finishing also increases resistance to corrosion and abrasion on aluminum. This aluminum is 100% recyclable and uses an eco-friendly water-based process without any volatile organic compounds.
